

EDUCATION

Dayananda Sagar University, Bangalore	Karnataka, India
Bachelor of Technology (Computer Science & Engineering)	Sept 2020 - Oct 2024
D.A.V. Public School, Bokaro Steel City	Jharkhand, India
Class XII – 61.4%	June 2019
D.A.V. Public School, Munger	Bihar, India
Class X – 8.2 CGPA	April 2017

SKILLS SUMMARY

- **Programming Languages:** Python, SQL, JAVA
- **Frameworks (Machine Learning):** Pandas, NumPy, Scikit-Learn, Matplotlib
- **Tools (Data Analytics):** Power BI, Excel, PowerPoint, Tableau, MySQL
- **Technical Support:** Incident Resolution, Troubleshooting, Ticket Handling
- **Operations:** KYC Verification, AML Compliance, Risk Assessment, Fraud Detection
- **Customer Service:** Customer Handling, Escalation Management, Stakeholder Communication, Problem Solving
- **Professional Skills:** Team Collaboration, Process Improvement, Time Management, Analytical Thinking, Excellent communication

WORK EXPERIENCE

PhonePe Operation Associate	April 2025- Present
• Verify PAN and KYC documentation while ensuring compliance with RBI regulations and internal policies. • Handle customer queries related to KYC verification, documentation discrepancies, and account-related concerns. • Manage customer escalations and coordinate with compliance, AML, and risk teams for timely issue resolution. • Maintain 99%+ data accuracy through detailed verification, reconciliation, and CRM updates. • Identify suspicious activities and irregular submissions, contributing to fraud prevention and risk mitigation. • Demonstrate strong ownership by proactively resolving customer issues and reducing turnaround time. • Support process improvement initiatives to enhance operational productivity and customer satisfaction.	

PROJECTS

Diabetic Retinopathy Detection	December 23- February 2024
• Developed a deep learning-based image classification model using TensorFlow and Keras to detect diabetic retinopathy from retinal eye images. • Performed data cleaning, preprocessing, and image preparation using Python libraries such as NumPy and Pandas to improve model performance. • Trained and optimized a Convolutional Neural Network (CNN) model, achieving approximately 94% accuracy in disease detection. • Used Matplotlib for visualizing training results, accuracy trends, loss curves, and model performance metrics. • The project aimed to assist in the early detection of diabetic eye disease, helping reduce manual screening efforts and improve healthcare decision-making.	
Credit Card Fraud Detection	September 23- October 2023
• Developed and fine-tuned a logistic regression-based machine learning model achieving an 87% accuracy rate in predicting credit card fraud • Minimized false positives by 16% through rigorous feature engineering and hyperparameter tuning processes. • Implemented under-sampling and ensemble techniques to address class imbalance, leading to 15% improved performance. • Successfully mitigated fraudulent transactions while optimizing model efficiency by 23% and accuracy by 6%.	
Comprehensive Income and Demographics Analysis Dashboard	Jan 2025
• Developed interactive dashboards using Excel and data visualization techniques to analyze demographic and income trends. • Processed and analyzed datasets containing 10,000+ records with high accuracy. • Generated actionable insights that improved reporting efficiency and decision-making.	

CERTIFICATES

Data Engineering Professional Certification Rapid Miner CERTIFICATE
• Earned the RapidMiner Data Engineering Professional Certification, gaining expertise in data transformation, workflow automation. • Developed efficient data pipelines and automated processes to improve data handling, preparation, and overall operational efficiency.
Data analytics Certification GeeksForGeeks CERTIFICATE
• Successfully completed a comprehensive Data Analytics Internship and Training Program covering data analysis and visualization • Gained hands-on experience with tools such as Excel, SQL, Python, and Power BI for data cleaning, processing, and reporting. • Applied analytical techniques to real-world datasets to generate actionable insights and support data-driven decision-making.
